T5 Lamps 28 watt to 54 watt

T5 Fluorescent Lamps 21 watt to 54 watt. New low profile (5/8" diameter, mini bipin - G5) light source, versatile slim design for better luminaire optics, and wider variety of applications. Energy efficient, high lumen per watt, out performs T8 systems. Wide range of color temperatures 3000K, 3500K, 4000K, 5000K, 6500K, and our exclusive 5500K, 91 CRI Full Spectrum. Long life – 20,000 average hours, prevents build up of discarded lamps, which means less waste. Use only with T5 program start ballasts with end of life protection.

Aquarium - Currently we have 5000K, and 6500K (54 watt), for our Exclusive Full Spectrum 5500K, 91 CRI for Fresh Water.

T6 The Next Generation of T5 Lamps

Naturallighting.com 888.900.6830

T6 The Next Generation of T5 Lamps, Universal wattage. T5.5 lamps are direct replacements for standard T8 or T12 fixtures. No need to buy expensive T5 fixtures, or retrofit existing fixtures to use shorter T5 lamps. T6 have standard bipin (G13 base) connection, and are standard lengths (24", 36", and 48"). These lamps have thicker glass, which are more durable, and operate at slightly lower temperatures than standard T5 lamps. The T6 lamps will operate with T8 electronic ballast, and T5, 54 watt ballasts. The T6 provide 10% to 40% more light output than standard T8 lamps. Use only T8 or T5 program start/end of life protection.
