

Uses for Sun Aire™ Portable Ultraviolet Air Purifiers

Eliminate Household Odors... Sun Aire™ eliminates odors of smoke and a myriad of other odors from pets (widely used by Veterinarians, Breeders, anyone with indoor pets), cooking, mold, mildew and other household sources. Eliminate hazards provides a healthier atmosphere and a more comfortable living environment.

Control Indoor Air Pollution... Energy efficiency has resulted in "sick building" syndrome. Many new facilities are built airtight, and the lack of fresh air results in odors, contaminants being trapped inside. Sun Aire™ purifiers can dramatically reduce pollution, contamination, creating a safer indoor environment. Beauty salons, restaurants, lounges, cleaners, stores and many other types of business areas can be cleansed of odors, and contaminants.

Cigarette and Cigar Smoke... Smoke filled restaurants, bars, lounges, pool halls are extremely irritating and dangerous due to second hand smoke. Sun Aire™ purifiers neutralize and eliminate smoke and results in healthy pleasing atmosphere for all customers.

Mold Control and Removal... Mold is a major problem in today's airtight environments. Medical studies have found that mold and mildew are the number one causes of allergic reaction symptoms. *Stachybotrys Chartarum* (atra) is a greenish-black fungus that can infect high-cellulose material, such as straw, hay, wet leaves, dry wall, carpet, wall paper, fiber-board, ceiling tiles, thermal insulation, etc. This toxic mold reproduces in areas where relative humidity is above 55%.

Using Sun Aire™ purifiers can help eliminate and retard mold growth in your home, and reduce the high cost of mold remediation and removal. Thousands of dollars are spent on mold remediation, removal, repair, and repainting each year. In many cases, mold returns within a short period of time because spores were distributed into the air and attached to other areas, resulting in additional growth and continuing problems. The only way to eliminate this problem is by the use of an ultraviolet air purifier that destroys and eliminates airborne mold spores. Many people have experienced identifying and removing mold through expensive renovation and repair, however few people know eliminating mold can be as simple as using the Sun Aire™ Ultraviolet Air Purifier.

Hotel and Motel Room Odor Removal... Sun Aire™ keeps rooms and lobbies smelling fresher and cleaner, and reduces cleanup time enabling rooms to be in service faster. Rooms stay fresher longer and customers will appreciate the fresh clean, fresh aroma. Sun Aire™ units are portable and safe for use while the room is being cleaned. Sun Aire™ purifiers eliminate odors and smoke from rooms, and keep rooms smelling fresh and clean without additional work or supplies.

Hospitals, Elderly Care Facilities, Medical, Dental Facilities... Sun Aire™ purifiers reduce and eliminate airborne bacteria, viruses, and other infections. As noted in the news, infections are now known to spread within hospitals, medical facilities, etc. Sun Aire™ will make medical facilities clean and safe, and reduce potential hazards.

Vehicle Restorations... Sun Aire™ purifiers eliminate nasty odors from cars, trucks, vans, buses, and help in elimination of mold and bacteria from water damaged or fire damaged vehicles. A fresh smelling automobile will help increase sales of used or pre-owned vehicles.

Fire Restorations... Sun Aire™ purifiers are excellent for eliminating fire and flood odors. These odors are among the most difficult to remove and can only be effectively removed with a powerful ozone generator.

Pet and Animal odors... Excellent for eliminating pet odors in veterinary offices, kennels, aviaries, reptile cages, and homes. Eliminate areas of bacteria, viruses, and mold that can be very harmful to humans and pets alike, and reduce the spread of viruses to other animals.

Controlling Insects and Rodents... Sun Aire™ purifiers eliminate bacteria and odors from insects and vermin. Use in basements to retard mold growth, as well as keep insects and mice out.

Greenhouse and Hydroponics... Sun Aire™ purifiers in hydroponics or greenhouse settings will eliminate harmful molds, viruses, and bacteria.

Boat Odors... Boats can develop strong fish, mold, and other offensive odors. Sun Aire™ purifiers help remove mold and fish odors with high ozone shock treatments.

Sun Aire™ purifiers use photo oxidative techniques to quickly and effectively oxidize odors, molds, mildew, fungi bacteria, viruses and other airborne pollutants. Oxygen allotrope (allotrope: one or two or more existing forms of an element. Ex: lampblack, graphite and diamond are allotrope of carbon) in the form of O4, O5, O6, etc. breaks down the molecular structure of noxious and toxic gases as well as other organic matter (the source of mold, mildew and most odors) and pathogens. The process is one of elimination vs. filtration.
